Summary

Hi, I'm Maxwell. I'm a 21 year old IT Consultant based in Bristol UK, specialising in Linux systems administration and network management. I'm passionate about building reliable, functional, performant and secure systems that help people & businesses thrive.

I have experience working in accordance with various compliance requirements (PCI-DSS, etc). I'm happiest when I'm on a motorcycle, playing with my cat Luna, or home-labbing to build on my existing skill/knowledge base.

Experience

IT Operations Engineer

NCR: Software Defined Store

Nov 2020 - Present (2 years 5 months)

Since joining the team at NCR, I have had the opportunity to collaborate closely with experts in the Virtualization and Edge IT industry. NCR SDS design and maintain server appliances that power Edge locations (retail, branch offices, etc) through a combination of technologies including virtualization and redundant/resilient storage systems such as OpenZFS. My role within the Operations Team has been to pro-actively monitor, maintain and protect the vast network of Zynstra appliances that have been deployed worldwide, to ensure the locations that they serve are ready for the challenges of the business day.

I have found the team at NCR to be welcoming in all regards, and I am enjoying the opportunity to learn every day

Customer Service Representative

Domino's

Apr 2019 - Oct 2020 (1 year 7 months)

Working with the Domino's team has really helped me to develop my service skills, as well as achieve a better understanding of the workplace environment.

System Analyst

Bluetree Technologies Ltd

Feb 2012 - Oct 2020 (8 years 9 months)

Bluetree Technologies is a web services company specialising in website design and hosting founded by my parents in 1999. From 2012 through to 2020, I had designed, built and maintained the IT and hosting infrastructure for Bluetree, including administrating a mix of Linux and Windows-based systems on-premise and in the cloud.
